ABOUT US

A Future Empowered by the Past

The foundations of our company were laid in the 20th century when the Çetinkaya family began operations in the domestic cleaning industry, focusing on the production of textile and plastic products. In 1997, Üçtem-Plas was officially established, evolving into a leading brand in the Turkish market and successfully exporting to more than 75 countries worldwide.

Driven by consistent growth and increasing global demand, the family launched the UTP Professional division, specializing in the manufacture of high-quality professional cleaning equipment in Turkey. Our extensive product range includes textile cleaning materials, multi-purpose trolleys, window cleaning tools, brushes, and equipment tailored for the hospitality sector.

All of our products are developed and designed in-house by our R&D department, within our 15,000 m² facility, where more than 200 dedicated employees work toward delivering excellence.

OUR MISSION

Creating Today for a Sustainable Tomorrow

Our mission is to transform the plastic cleaning equipment industry by offering innovative, eco-friendly solutions that reduce environmental impact without compromising performance or durability. We are dedicated to minimizing plastic waste through responsible sourcing, the use of recyclable materials, and sustainable manufacturing practices. With integrity and creativity at the core of our approach, we aim to lead positive change in the industry and empower our customers to make environmentally conscious choices for a cleaner, greener future.

OUR VISION

Innovative Approaches Shaping the Future

Our vision is to shape the future of innovation in the cleaning industry through sustainable production practices, a commitment to environmental stewardship, and a deep respect for future generations. We aspire to grow in harmony with nature while delivering solutions that elevate industry standards and support a more sustainable world.

KEEN TO THE ENVIRONMENT

"WITH DAILY ACTIONS"

We are committed to taking steps towards environmental protection and sustainability, a responsibility we all share. As a company offering cleaning products, we are dedicated to maximizing our environmental responsibility and providing eco-friendly solutions.

Raw Materials:

During the designing phases of our plastic cleaning tools, our R&D departments always choose recycle raw materials which can be recycle again.

Energy:

In our production facilities, we place great importance on using sustainable energy sources. Working with clean energy sources such as solar and wind power helps us reduce our carbon footprint and contribute to energy conservation.

Packaging:

Our packaging is conceived with materials which easily integrated into the recycling processes system, contributing to a more sustainable world.

Leading in Environmental Consciousness and Tomorrow's Sustainable Solutions: UTP Professional Achieved Eco-Label Certification!

Environmental awareness and sustainability are fundamental values of UTP Professional, which conscious of its responsibility to the environment, once again demonstrates the importance it's role on eco-friendly production and operational practices by minimizing the environmental impacts.

By obtaining the Eco-label certification, UTP Professional strengthens its commitment to environmental sustainability. We will continue our efforts to minimize environmental impacts and efficiently utilize resources at every step from production to packaging, transportation, and product use.

We take pride in offering our customers and all stakeholders eco-friendly products. Our Eco-label certification will provide customers with transparent information about the environmental impacts of our products and help them to make eco-conscious choices.

Our Eco-label certification represents our dedication to environmental responsibility and sustainability.

At UTP Professional, we take pride in our journey towards excellence, having attained international certifications and memberships that reflect our commitment to quality, sustainability, and responsibility. We are certified with ISO 9001, ISO 14001, ISO 22000, ISO 45001, and ISO 26000, and we are also recognized by Sedex, EcoLabel, and ISSA Member.

These certifications and memberships demonstrate the highest standards in quality management, environmental performance, food safety, occupational health and safety, and social responsibility, while also ensuring ethical trade, eco-friendly production, and alignment with global industry standards. They reinforce our dedication to continuous improvement and strengthen our responsibility to our customers, employees, and stakeholders.

ISO 9001: Continuous Improvement in Quality

The ISO 9001 certification confirms that our quality management system complies with international standards. This certification forms the foundation of our quality management system, aiming to enhance customer satisfaction, improve process efficiency, and promote continuous improvement.

ISO 14001: Leadership in Environmental Performance

The ISO 14001 certification demonstrates that our environmental management system meets the standards. We continuously strive to reduce environmental impacts, preserve natural resources, and fulfill our commitments for a sustainable future through ongoing improvements in our environmental performance.

ISO 22000: Food Safety and Hygiene

The ISO 22000 certification validates that we adhere to the highest standards in food safety and hygiene. We meticulously follow food safety standards to provide our customers with products they can trust, while promoting a culture of food safety throughout our organization.

ISO 45001: Priority on Occupational Health and Safety

The ISO 45001 certification confirms the effectiveness of our occupational health and safety management system. We continuously assess risks, implement appropriate measures to protect the health and safety of our employees, and strive for continuous improvement in our occupational health and safety performance.

ISO 26000: Social Responsibility

The ISO 26000 standard guides our corporate social responsibility practices. It ensures that we act ethically, contribute to sustainable development, respect human rights, and foster transparency and accountability in all our operations.

Sedex: Ethical Trade and Responsible Business

As a Sedex Affiliate Audit Company, we commit to ethical trade, responsible sourcing, and transparent business practices, ensuring fair treatment of workers and sustainable supply chains.

EcoLabel: Environmentally Friendly Products

The EcoLabel certification highlights our dedication to producing environmentally friendly products with reduced ecological impact, supporting green cleaning and sustainability goals.

ISSA Member: Global Cleaning Industry Standards

Being a proud member of ISSA, the worldwide cleaning industry association, reflects our alignment with global best practices, industry innovations, and professional standards in hygiene and cleaning solutions.

Buckets & Baskets

Practical, Durable & Functional Solutions

The UTP Professional range of buckets and baskets is designed for professional cleaning and industrial use with ergonomic structures and durable materials. Built to withstand heavy-duty usage, they ensure long-lasting performance. Different sizes and models work seamlessly with cleaning trolleys, making daily operations more efficient.

Maid trolley baskets keep small cleaning tools organized, while buckets of various capacities provide ideal solutions for water, chemicals, or waste management. Lightweight, portable, and hygiene-focused, they are the preferred choice for hotels, hospitals, schools, and industrial facilities.

HYGIENIC

UTP mop systems ensure the highest level of hygiene; thanks to the touch-free removal system, the flat mop can be easily removed without hand contact. Preventing direct contact with dirt ensures maximum control of cross-contamination.

ANTI BACTERIAL

UTP mop systems effectively collect dirt and easily clean over 95% of bacteria. They effortlessly clean corners, stairs, and skirting boards. The system has no limits and can be used to clean both horizontal and vertical surfaces, ensuring high performance in both cases. These features provide maximum efficiency and hygiene in the floor cleaning process.

ERGONOMIC

Utp mop systems that allows for easy attachment and removal of the mop head or cleaning cloth helps to conserve the user's time and energy. The quick assembly feature facilitates the effortless changing of mop heads or cloths during cleaning. This ensures that users do not feel fatigued even during prolonged cleaning tasks.
